

NQH BORING FUND

NQH BORING FUND, LLC

INTRODUCTION

We post daily financial & economics news, select market opinions, as well as the fund performance, and its portfolio statistics on our FB fanpage, kindly pay a [visit](#) for more information!

On September 22, 2021, NQH Boring Fund (in short, “Fund”, or “the Fund”) was established, with its portfolio performance evaluated periodically using the fund certificate method (“CCQ”), oriented to operate as a family-owned, closed balanced mutual fund.

Nearly a decade ago, the writings and materials on the lives and investment philosophies of Li Lu, Joel Greenblatt, Seth Klarman, and Peter Lynch exerted a profound influence in shaping the investment and governance style that the Fund pursues, through a boring and simple process: ‘Seek Insights, Buy Bargain, Do Nothing,’ with the objective of achieving portfolio performance that outperforms the market (Benchmark(*): Adjusted VNAllshare and Adjusted VN30) over the long term.

The Fund was established under fairly bleak circumstances. Having only just begun operating in less than 05 years, it was served two major downturns by Mr. Market in quick succession, as an early lesson rather than a gentle start (namely, the post Covid downturn in 2022 and the Trump tariff crisis in early 2025). Nevertheless, the Fund maintained performance that outperformed the market, even as that margin narrowed considerably at certain points, an experience that instilled a deep and lasting appreciation for risk management discipline. Having weathered numerous complex developments and adverse market conditions, the Fund's assets under management (“AUM”) hit its first milestone on February 2, 2026, surpassing VND 1,000,000,000.

Early-day Capital Contribution Structure

Unit: VND (USD) | USD/VND FX (2021): 23.000

NQH	VND 69,640,000 (~USD 3.028)	The entirety of the Founder's capital at the time of establishment, having gone all in (September 22, 2021).
The Family	VND 200,000,000 (~USD 8.696)	The Family commit capital to the Fund's certificates, with disbursement made in multiple tranches.

A record of our humble beginning to remind us of how far we have come. Start small, but dream big!

() Adjusted VNAllshare: an index that accounts for post dividend price effects and excludes enterprises without genuine trading liquidity on the exchange.*

() Adjusted VN30: the VN30 index adjusted for post dividend price effects.*
